

ERIN N. COOPER, AIA, LEED AP
Cooper Green Design: Owner, Architect

Cooper Green Design founder, Erin Nunes Cooper, AIA, LEED AP is an architect and green building consultant with a personal passion for green building design. Erin is a LEED Accredited Professional, a licensed architect in Massachusetts, and holds an NCARB Certificate. Erin's strength is the design and management of complex projects with a critical emphasis on green design. She is a clear communicator who seeks to make every project greener, more efficient, and an inspiring place to live, work, and play.

Services include architectural design, LEED consulting and documentation, daylight measurement and modeling, charrette facilitation, training and education programs, campus building inventories, and green house gas emissions calculations. Ms. Cooper is a frequent speaker at green building and sustainability events. Her writing has appeared in Environmental Design + Construction, AIArchitect, and Building CT Green.
